

## LISTING OF CLAIMS

1-24. (canceled)

25. (currently amended) A composition comprising colchicine ((S)-N-(5,6,7,9-tetrahydro-1,2,3,10-tetramethoxy-9-oxobenzo[a]heptalen-7-yl)acetamide) and cisplatin wherein the modulation of a cellular proliferative disease by colchicine and cisplatin is greater than ~~that~~ the sum of the modulation for colchicine ~~or~~ and cisplatin when administered alone.

26. (previously presented) A composition comprising thiocolchicoside (2-demethoxy-2-glucosidoxythiocolchicine) and cisplatin wherein the modulation of a cellular proliferative disease by thiocolchicoside and cisplatin is greater than that for thiocolchicoside or cisplatin alone.

27. (previously presented) A composition comprising thiocolchicoside (2-demethoxy-2-glucosidoxythiocolchicine) and etoposide wherein the modulation of a cellular proliferative disease by thiocolchicoside and etoposide is greater than that for thiocolchicoside or etoposide alone.

28. (previously presented) A composition comprising thiocolchicoside (2-demethoxy-2-glucosidoxythiocolchicine) and camptothecin wherein the modulation of a cellular proliferative disease by thiocolchicoside and camptothecin is greater than that for thiocolchicoside or camptothecin alone.

29. (previously presented) A composition comprising thiocolchicoside (2-demethoxy-2-glucosidoxythiocolchicine) and vinblastine wherein the modulation of a cellular proliferative disease by thiocolchicoside and vinblastine is greater than that for thiocolchicoside or vinblastine alone.

30. (previously presented) A composition comprising thiocolchicoside (2-demethoxy-2-glucosidoxythiocolchicine) and paclitaxel wherein the modulation of a cellular proliferative disease by thiocolchicoside and paclitaxel is greater than that for thiocolchicoside or paclitaxel alone.
